

Exciting News

As a team, our vision for the Reception and Nursery is that we will work more collaboratively as one class rather than as 'Comets' and 'Pluto'. We felt we wanted a fresh image and so have decided that we will change the name to reflect this new way of working. After a lot of discussion we have agreed that our new class name will be '**Astronauts**', as this describes our children as they prepare for their journey through the planets of Mercury, Jupiter and Mars.

This week we had a very exciting delivery from the lovely builders who have been working on the Old Hospital. They very kindly gave us some pallets and scrap materials which we have used to make a bug hotel. The children have had great fun creating this and they can't wait to see some mini beasts using it.

Some Greenery in our Garden

The children have loved having some greenery in our outdoor area. We have created a versatile space that has been well used this week. The children have been using it as a space to practice dance moves, a quiet space to put the dollies to bed, whilst playing 'mums and dads' and a great area for us to sit and have snack in the sunshine. We are looking to develop this area further with some edging and some wooden logs for seating. Watch this space!

Our Future Plans

We are always looking to develop our area to keep our children engaged. We would love to enhance our mud kitchen with some real life kitchen electricals. So, if you have any electrical items that you no longer need or are looking to get rid of, we would very much appreciate them. This may be things such as a microwave, toaster, kettle, electric whisk, toastie maker. These items will be checked over and risk assessed before they are used by any children.

Enjoy the Easter Break!
Ms. Eaton and the Early Years Team
