

Mercury Class

Dear Parents and Carers,

Welcome back to a new school term, we hope you had a lovely Christmas. It will be a great term full of fun learning opportunities.

For those of you who don't know me, my name is Mrs Knowles. I am an experienced teacher and have been teaching since 1996. I am looking forward to working closely with you, your children and Mrs Conroy.

This term in Literacy we are exploring a range of text types which include letter writing, instructions, and diaries.

In Numeracy the main topics are division, counting within 100, measuring lengths and heights, shape and fractions. We will be doing this practically using a wide range of resources to develop understanding.

Do risk takers become inventors? This is the big question that the children will be researching in Science which will lead them on to investigate waterproof materials.

The focus in R.E is Christianity, looking at the features of a church and discussing the significance of the church for Christian Worship.

If at any time you have any questions or concerns please do not hesitate to speak to us, leave a message at the school office or email, m.knowles@southwoldprimaryschool.org.

Your support and co-operation is very important to your children's education and we are looking forward to working with you.

Kind Regards

Mrs Knowles

Weekly Events

Daily – Reading Books

Tuesday – P.E

Ways to help at home

Please read with your child regularly, it is so important they are constantly reading to help in all areas of their learning. As well as listening to your child read to you, we believe bedtime stories play a big part in engaging children with reading, so please also read to your child every evening.
