

Mars Class

Dear Parents and Carers,

I hope you all had a relaxing break and have all recovered from the visit from the Easter Bunny.

As we prepare our Year 6s for SATs, most of our focus will be on revising key concepts, especially around the 4 number operations and then shape and problem solving afterwards.

Our English and History topics will be linked this term as we will learn about Empires and why they rose and fell. Through this topic we will learn how to write persuasively, as well as balanced arguments.

As Geographers we will study the evidence that cartographers have given us to compare the growth of empires.

Our science this term will focus on Evolution and how living things have adapted to their environments over time.

As Artists we ask the question, What makes a skyline so striking. We will learn techniques to help us build a 3D picture to create our own skylines.

In other topic areas we will find out about religious stories and online safety.

Any questions, please feel free to contact me or speak to me at drop off/pick up.

Kind Regards

Mrs Youngman, Mr Arlow and Miss Hooper

Weekly Event

Tuesday– PE

Important Announcements

- Although the weather is changing it is still deceptively cold, please could children have a coat in school.
- Gates open at 8:20
- School starts at 8:30
