

## Mercury Class

Dear Parents and Carers,

Welcome back to a new school term, we hope you had a lovely Christmas. It will be a great term full of fun learning opportunities.

This term in Literacy we are exploring the book, Meerkat Mail. We will have fun writing our own journey tales and will then move on to writing letters.

In Numeracy the main topics are place value, addition, subtraction, money, multiplication and division. We will be very busy doing this practically using a wide range of resources to develop understanding.

Planet Earth is our overall theme researching in the foundation subjects. This will all link back to our story in literacy. In Science the children will be finding out about different animals identifying how they are similar and different.

In Art the children will be exploring the work of Henri Rousseau and then moving on to Franz Marc's art work. Franz Marc's work links in with animals as he is famous for his brightly coloured animals.

If at any time you have any questions or concerns please do not hesitate to speak to us, leave a message at the school office or email, [m.knowles@southwoldprimaryschool.org](mailto:m.knowles@southwoldprimaryschool.org).

Your support and co-operation is very important to your children's education and we are looking forward to working with you.

Kind Regards

Mrs Knowles

## Weekly Events

Daily – Reading Books

Tuesday – P.E

## Ways to help at home

Please read with your child regularly, it is so important they are constantly reading to help in all areas of their learning. As well as listening to your child read to you, we believe bedtime stories play a big part in engaging children with reading, so please also read to your child every evening.
