Friday 19th May
Friday 23rd June
- SATs week beginning 8th May
- Come and join us- 17th May
- Southwold Arts festival choir- 28th June

Dear Parents and Carers,

I hope you all had a relaxing break and have all recovered from the visit from the Easter Bunny.

As we prepare our Year 6s for SATs, most of our focus will be on revising key concepts, especially around the 4 number operations and then shape and problem solving afterwards.

Our English and History topics will be linked this term as we will learn about the suffragettes and whether they solved inequality for women. Through this topic we will learn how to write persuasively, as well as balanced arguments.

As Geographers we will learn about human migration and think about the question "What's the difference between where we live and where we originate from?"

Our science this half term will focus on the Circulatory system and how we can keep our bodies healthy. Then after half term we will be looking at human reproduction and what happens to humans as they get older?

As Artists we ask the question, "Will modern art become as well-known as traditional art?"

In other topic areas we will find out about British food and what it means to be multicultural.

Any questions, please feel free to contact me or speak to me at drop off/pick up.

Kind Regards

Mrs Youngman and Mr Arlow
